

**INFLUENCE OF CREDIT RISK STRATEGIES ON FINANCIAL PERFORMANCE
OF DEPOSIT TAKING COOPERATIVE SOCIETIES IN MOMBASA
COUNTY, KENYA**

FATMA HASSAN SHARIFF HASHIM

**A THESIS SUBMITTED TO THE SCHOOL OF BUSINESS IN THE
DEPARTMENT OF BUSINESS ADMINISTRATION IN PARTIAL FULFILMENT
OF THE REQUIREMENT FOR THE AWARD OF DEGREE OF MASTER OF
BUSINESS ADMINISTRATION (FINANCE OPTION) OF TECHNICAL
UNIVERSITY OF MOMBASA**

2024

DECLARATION

This thesis is my original work and has not been presented for award of a degree in any other university.

DEDICATION

I dedicate my thesis to my loved ones and close friends in appreciation of their unwavering love and support during the entire process. To me, you serve as an inspiration. You have given me the confidence and drive I need to succeed in my academic endeavors.

ACKNOWLEDGEMENT

My utmost gratitude is to ALLAH Almighty for granting me courage, knowledge as well as insights to successfully undertake this research study. My earnest appreciation is to my mentors and supervisors Banafa A. Ali, PhD as well as Wahida Bana, PhD for their unwavering guidance throughout this research study writing through their constructive commentary, supervision and support. I also want to thank my loved ones for the unwavering love and support they have shown me. ALLAH's blessings be with you all.

DEFINITION OF TERMS

Collateral	It refers to the securities pledged for the repayment of loan taken in financial transactions by a borrower and they may be forfeited in the event of loan default
Credit Assessment	A lender's process to determine your ability to repay the loan and how risky it is for them .
Credit Monitoring	It refers to the tracking of changes in borrower behavior so as to take note of potential fraud, as well as changes to clients' creditworthiness .
Credit Policy	An array of conditions outlining how your business will extend credit to customers and collect delinquent debts
Credit Risk Strategies	It denotes to the approaches and techniques employed by financial institutions and businesses to identify, assess, monitor, and mitigate the potential risks associated with lending money or extending credit to individuals, companies, or other entities.

ABSTRACT

The performance of SACCOs in Kenya has been wanting in the recent past, this scenario occasioned the collapse of some SACCOs such as the Maseno builders and the Ekeza SACCOs. These poor performance instances in the SACCO sector motivated this current research study. The main objective of this study was to investigate the influence of credit risk strategies on the financial performance of deposit-taking cooperative societies in Mombasa County, Kenya. The specific objectives of this study comprised of an investigation on the influence of credit risk supervision strategies, diversification of loan strategies, Proactive risk communication strategies, and Technology Adoption strategies on the financial performance of deposit-taking cooperative societies in Mombasa County, Kenya. The theories which were used in supporting this study comprised of the Agency theory, Credit theory, Modern Portfolio Theory and the Resource-Based View Theory. This study used the descriptive research design. The target population for the study consisted of 109 participants from the finance, internal audit and Loan departments across all six deposit-taking SACCOs in Mombasa County. The samples size for this study comprised of 86 units of analysis which was determined via the Yamane Taro 1967 sample size determination formular. The ultimate selection of the sample size from the target population was conducted via the stratified random sampling technique. This current research study used questionnaires as the tool for data collection. A pilot test was conducted with a sample of 8 (10% of 86) randomly selected respondents from the deposit-taking SACCOs in Mombasa County. The regression model in the Statistical Package for Social Sciences version 26 was used in data analysis. The regression statistics from the model were used in testing the hypothesis. The hypothesis testing led to the rejection of H_{01} , H_{02} , H_{03} and H_{04} , thus indicated that Credit Risk supervision strategies, Diversification of loan strategies, Proactive risk communication strategies and Technology adoption strategies have a significant positive influence on the financial performance of DT SACCOS in Mombasa County, Kenya. The researcher therefore recommends that DT SACCOS in Mombasa County, Kenya should take advantage of the credit risk strategies at their disposal and

implement them because they have a significant influence on their financial performance.
